T5 MASTER

ALL THE
QUALITY AND RELIABILITY OF VITALI
+
AN ESSENTIAL
AND FUNCTIONAL PRODUCT

T5 MASTER

1

TOP RELIABILITY

SOLIDITY WITHOUT COMPROMISING ANYTHING

1. High quality of materials combined with the utmost care of details.
2. The use of noble materials (aluminium, stainless steel, bronze, ceramics, special plastics) ensures resistance to any type of mechanical and chemical stress.
3. Perfect combination of functionality, robustness, safety and patient comfort.
4. Configurable for left-handed users.

In summary: **WITH T5 MASTER, YOU WORK IN TOTAL SAFETY**

2

TOP RATIONALITY

MAXIMUM EFFICIENCY IN THE WORKING PROCESS

1. Large working area to encourage the interaction and synchronized operation of the dental team.
2. Extension of instrument tubes (over 80 cm) to facilitate the dentist's work.
3. 90° rotation of the cuspidor to allow the nurse to get closer with greater freedom.
4. Possibility to choose between 3 different types of nurse's console.

In summary: **A DENTAL UNIT DESIGNED TO PROMOTE THE QUALITY OF YOUR WORK**

3

TOP SIMPLICITY IN EVERY FUNCTION AND DETAIL

1. Simplicity and freedom of configuration to meet your operational needs.
2. Simplicity of sanitizing with many removable and autoclavable details both on the instrument table and in the cuspidor.
3. Simplicity of function management through intuitive controls, with membrane keys that ensure immediate response.

In summary: **THE DENTAL UNIT THAT NEVER CREATES PROBLEMS**

4

TOP AVAILABILITY OF OPTIONS TO MEET DIFFERENT NEEDS AND HABITS

Complete work station that can be further customized with:

- multimedia system
- VDS system (Vitali Disinfection System)
- pneumatic headrest
- chair with Memory Foam padding
- wireless foot control
- Alya or Maia LED operating lamp.

In summary: **YOU CAN CREATE A MADE-TO-MEASURE WORK STATION**

5

TOP SAFETY

TO PREVENT AND FIGHT ANY RISK

Mechanical safety devices

T5 MASTER features anti-crushing safety devices for its backrest, chair and nurse's console.

Hygiene safety devices

1. Anti-reflux device
2. Removable and autoclavable details (instrument support in silicone, lamp handles, cuspidor accessories, tray cover)
3. Tray-holder in removable steel that can be sterilized
4. Removable chair paddings for easy and deep sanitation.
5. VDS Vitali Disinfection System (optional)

In summary: **SAFETY FOR ALL, FOR PATIENTS AND THE DENTAL TEAM**

6

VITALI DISINFECTION SYSTEM THE MAXIMUM SAFETY OPTION

Each Vitali unit can have the VDS (Vitali Disinfection System) equipment: certified automatic and exclusive system for the effective disinfection of the inner circuits.

VDS can:

- ✓ treat the mains water with UV-C rays before being used by the dental unit (UV-Osmo-Eco);
- ✓ treat, with a wide-ranging disinfectant (Multiclean), the water circuit of operational instruments, reducing the risks of cross infection;
- ✓ use a sterile liquid as an alternative to the mains water to prevent the contamination of the water circuit;
- ✓ sterilize air intake;
- ✓ constantly monitor the functional parameters of the system to ensure their proper operation and maximum safety for the operator and the patient.

In summary: **AN INCREASINGLY NECESSARY OPTION**

WHY SHOULD YOU CHOOSE A VITALI UNIT?

T5 MASTER

IT IS MADE IN ITALY

Italy is the world's third largest producer of technologies and furnishings for the dental sector, after the US and Germany.

About 60% of national production goes overseas.

In the dental sector, Italian technology enjoys international credibility.

MADE IN ITALY, MADE IN VITALI

Vitali was founded more than 60 years ago and is a completely Italian company based near Bologna, in the centre of a district that is highly specialized in dental equipment and bio-medical devices.

In practical terms, this means:

- product reliability
- ongoing services

VITALI MADE FOR THE FUTURE

THE FACTS

VITALI has made important industrial investments

VITALI has invested in products

VITALI has strengthened its assistance and advice network in Italy and all over the world

THE EFFECTS

- **NEW PLANT**
- **FULL PRODUCTION CYCLE (design, production, control)**
- **RESPECT FOR THE ENVIRONMENT**

- **ENTIRELY NEW RANGE OF UNITS**

- **EFFICIENT SERVICE**
- **CUSTOMER SATISFACTION**

VITALI? NO PROBLEM!

How can you calculate the cost and value of a dental unit?

Only according to its purchase price? That's wrong. You need to take into account also maintenance costs.

In the case of Vitali units, the low incidence of assistance interventions has a double positive effect:

- **more profitability of the dental unit**
- **lower total cost of ownership** (i.e. the cost that sums price + maintenance costs + any loss of income for inefficiency of the dental unit).

VITALI MADE FOR YOU

- Because it puts the professional at the heart of every project.
- Because it offers the right value for money ratio: some solutions that can be used across the entire range of products, have allowed for optimization of production costs, without sacrificing quality.

VITALI SOCIAL RESPONSIBILITY

Vitali has been participating for several years in non profit projects designed to bring dental care to Eastern Europe countries.

In particular, Vitali has endorsed the OVERLAND FOR SMILE onlus humanitarian project that aims at providing concrete assistance for the dental health of children in orphanages in Eastern Europe countries.

3 new units donated by Vitali to OVERLAND FOR SMILE, now equip a mobile dental studio installed on an Iveco truck.

T5 MASTER

WHAT THE DENTISTS SAY OF VITALI

"Top Functionality: and it is *indestructible* when it comes to reliability".

"Never had any problems".

"Aesthetically it is always as new: the plastics are perfect, no colour change, no creaking".

"Had a small problem after many years: it was solved immediately".

"I have been working with them for years."

"It still has modern lines, even after several years: you do not get tired of its design".

"You do not need assistance, but if you call them, they always solve any problems".

VITALI

designed for reliability
